

# Welcome to the Birmingham SharePoint Users Group

The Birmingham SharePoint Users Group was founded in October of 2008. Our mission from inception has been to share deep SharePoint experience with individuals who are interested in learning, sharing and growing their Microsoft SharePoint knowledge and capabilities.

The group's vision is to provide members with a forum to hear industry experts present, and learn and teach others who are interested in the same technologies.

Our group meeting topics cover the entire spectrum of SharePoint technologies, including the SharePoint Portal Server, Windows SharePoint Services, SharePoint Server 2010, and SharePoint development with Visual Studio.

We are open to all and require no membership fee.
